EXPERIENCE

LexisNexis
June 2001 to Present

Tech Support Specialist II & IT Developer

- Developed web apps, scripts, and tools to streamline & automate internal processes.
- Created monolith web application (**ASP.Net, C#, MS SQL**) to accurately track computer hardware, provide a workflow for requests, and produce reports/metrics for management & asset accounting.
- Integrated above asset management web app with ServiceNow by building a **RESTful** web service (**ASP.Net, C#, Entity**) to pass along requests to our backend & workflow.
- Mocked and built templates for an innovation feedback tool run on the UserVoice SaaS platform.
- Assisted with **Sass/SCSS** styling to reflect branding and best **UX** for our Service Desk's ChatBot.
- Drove process improvement through automation scripts and tooling written in **PowerShell** and **Bash**.

Wayne Music Club | wayneband.com
January 2020 to Present

Board Member & Webmaster

- Redesigned & built a new web site for non-profit organization that supports the band programs at Wayne High School, particularly the Wayne Marching Band & Warriorettes.
- Worked with their existing **WordPress** installation, using it as a **headless CMS** via **REST API** on a custom **Vue.js** site.
- Created custom endpoints for posting/querying videos, photos, and events so all content is managed from the WordPress backend.

MMOCentralForums.com | mmocentralforums.com/ccg
April 2015 to June 2015

Web Developer

- Built a more secure custom **PHP** site for client's hosted gaming group.
- Uses host's forum's vBulletin API to determine identity, allowing secure access to certain areas based on group membership.
- Custom **CRUD** interface for users to display and track character progress offline from the game.
- **AJAX** powered schedule dynamically displays times for game events based on day of the week, automatically adjusting for Daylight Saving & British Summer Time.
- Provided an admin-only page for user & report management as well as a dashboard of site statistics.
- Built with: **HTML, CSS, PHP, mySQL, JavaScript**

SKILLS

Coding
JavaScript, Vue.js, HTML, CSS, C#, PHP, Bash, PowerShell

Databases
